

## IBC PROCEDURES FOR DEALING WITH BIOSAFETY/BIOSECURITY CONCERNS

PI = Principal Investigator of laboratory from which concern was observed.

\* REPORTING OPTIONS

Draft: 12/27/2011

White suit. Soft-edge photography. **One Glove.** The very definition of “cool”...

**Before leaving the lab, please de-glove and wash your hands. If you are carrying sensitive reagents, leave one hand ungloved to open/close doors and push elevator buttons in shared public spaces on your floor and in the building.**

Plus, you never know when you'll run into a tiger cub who wants a belly scratch...meow.

**Free hand for buttons and doors in public spaces and on shared equipment**

**Gloved hand for reagents**

**Office of Biological Safety**  
947 E. 58<sup>th</sup> St, AB120  
773.834.2707

# What would Michael do?

He would de-glove and wash hands before leaving the lab. He would wear just **One Glove** to carry sensitive reagents, leaving an ungloved hand free to open/close doors and push elevator buttons in shared public spaces.

**Gloved hand for reagents**

**Free hand for buttons and doors in public spaces and on shared equipment**

# What Would Jesus Do?

He would de-glove and wash hands before leaving the lab. Alternatively, he would wear just one glove to carry sensitive reagents, leaving an ungloved hand free to open/close doors and push elevator buttons in shared public spaces.

**Gloved hand for reagents**

**Free hand for buttons and doors in public spaces and on shared equipment**

**One Glove.**

**I don't always work at Biosafety  
Level 2...**

**But when I do, I wear the  
appropriate PPE: gloves, lab coat,  
and eye protection.**

**I don't always work with  
recombinant or synthetic DNA...**

**But when I do, I have an IBC-  
approved protocol.**
